RE: **DETERMINATION - CATEGORY I NON-FRIABLE ASBESTOS**
FREON FACILITIES DISMANTLEMENT
CHEMOURS CHAMBERS WORKS
DEEPWATER, NJ 08023

Dear Mr. Lacy,

Harvard Environmental, Inc. performed hazardous material assessments on the facilities and structures located at the Chemours Chambers Works facility located in Deepwater, New Jersey. These hazardous material assessments included sampling and characterization of asbestos containing materials associated with the FREON Facilities currently scheduled for dismantlement.

Portions of these facilities contain Category I Non-Friable Asbestos Materials which are not likely to become friable during the dismantlement process. Specific attention should be provided to the Contract Drawings - "Material Inventory Tables" which represent the Scope of Work.

Within these Drawings are table listings of materials designated as "Scope of Work - Asbestos - Segregate During Demolition". These specific materials have been characterized as Category I Non-Friable Asbestos Materials, not likely to become friable, by use of mechanical means.

During dismantlement of these systems, Harvard Environmental, Inc. will be performing on-going visual assessments to validate that materials determined to Non-Friable do not become friable, and that ground surfaces are maintained visually clear of any debris. This will additionally be supported with upwind and downwind air monitoring.

The demolition debris containing the non-friable asbestos will be transported to a landfill designated by Chemours that has approved acceptance of the debris containing Category I Non-Friable Asbestos Materials.

It should be noted that other Category I and Category II Asbestos Materials are included in the Scope of Work and will require traditional methods of abatement to remove, package, transport and dispose of in accordance with regulatory mandates. These material are listed on the Contract Drawings as "Scope of Work - Asbestos Abatement".

Please contact me if you have any questions.

Respectfully,

W.G. Morrison
President
Harvard Environmental, Inc.
